

DROOMS FACTSHEET

Drooms Chat

Centralise your deal communication

Drooms Chat is the first messenger tool for dealmakers, purpose-built for convenience during deal preparation and due diligence. Streamline your transactions with Drooms Chat, where every message, document, and contact is managed conveniently on one secure platform. No more switching between platforms – everything you need to get your deal done is right here.

Key features of Drooms Chat

- > **Intuitive messaging:** As intuitive as the messenger tools you're used to.
 - Start individual and group chats
 - React and reply to messages
 - Use read receipts
- > **Document sharing:** Link to documents directly in your data room.
 - Share files from your data room securely in the chat
 - Request and assign permissions to documents
- > **Contact management:** Contacts only need to be registered users, no active data room required.
 - Sync your mobile's address book
 - Invite contacts to your data room

Why choose Drooms Chat?

- > **Ultimate convenience:** Instantly collaborate with your team, clients, and stakeholders without having to switch to email or other platforms.
- > **Security first:** Built within Drooms' secure infrastructure, Drooms Chat ensures all corporate communications remain confidential and compliant with legal standards because they never leave the platform.
- > **Streamlined transactions:** Eliminate unnecessary delays by keeping all communications, processes, and documents within one platform, helping you get the deal done faster.

Discover the convenience, security, and efficiency that top industry professionals are already experiencing with Drooms Chat.
